STORY

RJR, The Total Electronic Package Solution

With the introduction of a new generation of adhesive technologies, high-speed assemblies, and electronic packages, RJR has emerged as the industry's truly "Total Electronic Package Solution". First, RJR's QuickBond™ adhesives technology sets the standard in high-speed package sealing by optimizing the fusion of thermodynamics, chemistry and mechanics. Next, the company's V-Pak and R-Pak provide high performance, low cost CCD and CMOS solutions for Optical Image Sensor and RF and semiconductor packaging. Then, RJR's AITS automated sealing equipment achieves Precision, Speed and Cleanliness with 600 UPH at 99% yield and .002 inch placement accuracy.

TECHNOLOGY STORY

Electronic Breakthrough In The Global Memory Chip Market

Several years of research at our RJR Polymers facilities in Oakland have resulted in developing new electronic materials and processing to help our customers better compete in the global memory chip market. RJR Polymers, Inc. and Samsung Aerospace have announced a Strategic Alliance and Licensing Agreement covering a new generation of technology for assembling computer memory devices.

A Signing Ceremony, traditional in Korea, was held in February at the RJR facilities with Top Executives from both RJR Polymers and Samsung in attendance.

RJR NEWS

Come Visit Us At The 1999 MTT-S Exhibit!

RJR Polymers, Inc. will be attending the 1999 International Microwave Symposium/Exhibition at Anaheim, CA during June 15-17. Come check out our latest in adhesive technology, QuikBond™.

The Exhibition brings together the technical and professional meetings of the MTT-S International Microwave Symposium (IMS), the Radio Frequency Integrated Circuits Symposium (RFIC) and the Automated RF Techniques Group Conference (ARFTG). Please come to booth #1933 and we'll show you why **RJR Polymers is The Total Electronics Package Solution!**
